**PH 808-245-1500**

**HAWAI'I HEALTH PARTNERS**  
Physician-led. Integrated quality care. Optimal health.

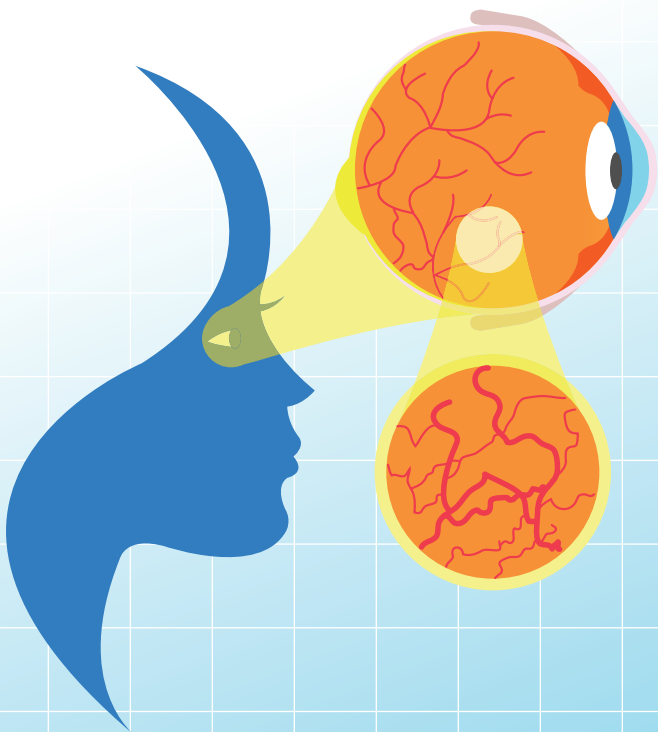

# *Why is the Annual Diabetic Eye Exam so Important?*

Diabetic retinopathy is the leading cause of blindness in adults ages 20-74.

People with both Type 1 and Type 2 diabetes are at risk.

There are often no early symptoms. However, over time, diabetic retinopathy can get worse and cause vision loss or blindness.

Early detection and timely treatment can reduce the risk of severe vision loss by 95 percent.

In diabetes patients, blood vessels can become swollen and bleed into the eye, destroying tissue and causing blindness. This can be prevented with an annual screening.
