

How to Conduct Peer-to-Peer Consults

The paid license of doxy.me allows you to complete a three-way call.

Example Use Cases:

- An attending, fellow, and patient would all like to participate in a video-visit together.
- A hospitalist would like to complete a video visit with a specialist who is working from home.

To complete a three-way call, do the following:

1. Invite both parties to your hph.doxy.me using the "Invite Via" Feature.
2. Start the call with one participant.
3. Click the "3-Way Call" option on your hph.doxy.me side-bar.
4. Select a participant to add to the call.

Please see this [quick instructional video](#) to get started.
