

## Interested in Receiving Email or Text Notifications for Video Visits?

We've recently enabled email and text notifications for video visits on the doxy.me platform.

To enable:

1. Go to Account Settings
2. Go to Notifications
3. Opt-In to Your Preferred Notification Method (Screenshot Below)

The screenshot displays the 'Notifications' tab within the account settings. It features a navigation bar with 'Settings', 'Notifications', 'Clinic Settings', 'Extensions', and 'Badges'. Below the navigation bar, there are four notification settings:

- Desktop alert**: OFF (toggle switch)
- Email alert**: OFF (toggle switch)
- Text message**: ON (toggle switch)
- Mobile number**: A text input field containing a dropdown menu with a US flag and the number '(201) 555-0123'.

A 'Save' button is located at the bottom of the notification settings section.
