

# PPE for Labor and Delivery

## Non-Pushing (First Stage)

Adopt the higher level of protection if rule out or confirmed COVID patient and contact will be within 6 feet for more than 10 minutes.

1

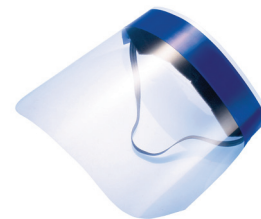

surgical mask

AND

OR

goggles

face shield

Headgear remains on health care worker through multiple patients (i.e., do not replace per patient)

If splashes/sprays are anticipated, full face shield should be worn.

- 2 Fresh gloves for all patient contact. Gown for contact/droplet precaution.
- 3 Break back tie in order to don gown over head gear.
- 4 Proper hand hygiene.

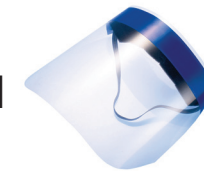

## During Pushing and Delivery (Second Stage)

1

N-95

and

full face shield

or

goggles

OR

CAPR

Headgear remains on health care worker through multiple patients (i.e., do not replace per patient)

Bonnets and booties as deemed necessary

If splashes/sprays are anticipated, full face shield should be worn.

- 2 Fresh gloves and gown for contact/droplet precautions.
- 3 Break back tie in order to don gown over headgear.
- 4 Proper hand hygiene.

Reduce number of people in room when possible.
